Dear Sirs,

**Re: US Patent Application for Wireless Data interface System for  
Fixed point-to-Point Communications  
Docket No: RIC97091C1 – George Kuriyan**

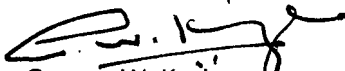

On May 7, 2007 I sent you a letter with attachment stating that the attached copy of a Submission does not represent my work towards Docket No: RIC97091C1. I would like to clarify that further and certify as follows:

I hereby certify to the best of my knowledge that the following are true regarding this Patent:

1. I am the Sole Inventor of the Patent.
2. The Submission referred to in the letter of May 7, 2007 does not represent my work.
3. The Submission is substantively different from the Patent identified here that was applied for and subsequently granted. Therefore, this is not a Continuation of my work towards demonstrating the Patent. It is a different invention because the Goals and Methodologies of the Submission are substantively different.
4. The Goals and Methodologies identified in the Submission will not achieve the Original Goals set forth in the Patent that was applied for and was subsequently granted. This has the potential to render systems running such Methods useless during operation.

If you would like to receive details about my certification, I shall be glad to provide you that.

Very Truly Yours,

  
George W. Kuriyan
